US Navy Veteran | Technical Instructor | IT and Cybersecurity Professional

PROFESSIONAL SUMMARY

Technical Instructor and Cybersecurity professional with 8+ years of IT, cybersecurity, network operations, and technical leadership experience, including extensive development and delivery of technical training for more than 100 military, civilian, and contractor personnel. Experienced translating complex IT, networking, cybersecurity, and systems concepts into practical instruction using hands-on labs, simulations, lectures, demonstrations, scenario-based exercises, computer-based training, and Learning Management System (LMS) supported instruction.

Recent hands-on cybersecurity experience with Microsoft Sentinel, KQL, Microsoft Defender for Endpoint, Entra ID, Intune, Conditional Access, Splunk, incident response, threat detection, threat intelligence, and endpoint security, complemented by extensive Cisco networking, Unix/Linux, server, and DoD infrastructure experience. Holds M.S. in Cybersecurity Management and Policy, two B.S. degrees in Networking and Cybersecurity, and multiple industry certifications. Experienced training and mentoring military personnel and technical teams, including veterans and service members transitioning toward civilian careers.

SKILLS

Technical Instruction: Adult Learning | Curriculum Development | Hands-On Labs | Technical Training | Student Mentoring | Coaching | Assessment | LMS | Computer-Based Training | Classroom | Virtual Instruction | Lab Simulations | Technical Documentation

IT and Cybersecurity: CompTIA A+ | Network+ | Security+ | CySA+ | IT Support | Security Operations | SIEM | Incident Response | Threat Detection | Threat Hunting | Threat Intelligence | Endpoint Security | Vulnerability Management | Digital Forensics

Security Tools: Microsoft Sentinel | KQL | Microsoft Defender for Endpoint | Entra ID | Intune | Conditional Access | Splunk | SPL | Wireshark | PCAP | PowerShell | Python

Networking and Infrastructure: TCP/IP | DNS | DHCP | Cisco IOS | Routers/Switches | Layer 2/3 | VLANs | VTP | Firewalls | VPN | Network Segmentation | Unix | Linux | Server/Systems Administration | LAN | WAN | Cloud Fundamentals | AWS | Azure

Security and Compliance: NIST | RMF | ATO | Security Controls | Information Assurance | Risk Management | Security Governance | Classified Environments

TECHNICAL TRAINING

CODEPATH Online Training
CYB102 Intermediate Cybersecurity August 2026

- Blue-Team/SOC Operations using Splunk/SPL, Wireshark/PCAP, Linux auditd/HIDS, endpoint monitoring, vulnerability scanning, MITRE ATT&CK, threat intelligence, incident triage, containment, and recovery.

VETS-Haste In-person/Online Internship
University of Florida's industry-based hardware security hardening program Oct 2025

- Industry-based training and internship focused on hardware security, system hardening, vulnerability mitigation, secure configuration, and applied security practices.

ACI Learning Online Training
Computer User Support Specialist (CUSS) Program May 2023

- PeopleCert ITIL 4 Foundation, CompTIA A+ (1101 & 1102), Network+(N10-008), Security+(SY0-701)

CERTIFICATIONS

CompTIA: A+ | Network+ | Security+ | CySA+
Cisco: CCNA
Cloud: AWS Certified Cloud Practitioner
Cybersecurity: $(ISC)^2$ Certified in Cybersecurity (CC)
IT Service Management: PeopleCert ITIL 4 Foundation
Cabling: KITCO Fiber Optic Installer/QA Supervisor
Repair: Xerox Copier Maintenance Technician

EDUCATION

University of Maryland Global Campus (UMGC) Adelphi, MD
M.S., Cybersecurity Management and Policy
B.S., Computer Networking and Cybersecurity | B.S., Cybersecurity Management and Policy

ITT Technical Institute Jacksonville, FL
A.S., Information Technology

PROFESSIONAL EXPERIENCE

CASPIA Technologies Gainesville, FL
IT R&D Engineering Intern August 2025 - October 2025

- Performed enterprise IT and cybersecurity operations using Microsoft Sentinel, Defender for Endpoint, Entra ID, Intune, and Conditional Access, investigating endpoint, authentication, access, and security events.
- Documented identity and access policies, firewall settings, and VPN configurations, strengthening endpoint security, access control, and secure remote access practices.
- Executed PowerShell commands and scripts for administrative, systems management, and cybersecurity tasks; participated in AWS Backup recovery activities.
- Researched security-awareness platforms for management approval, while supporting technical troubleshooting and escalation of enterprise IT issues.

Florida Blue Jacksonville, FL
IT Inventory Control Specialist October 2023 - December 2024

- Conducted enterprise IT operations in a highly regulated environment by maintaining technology accountability, security controls, documentation, troubleshooting, and operational continuity.
- Investigated technical and operational discrepancies, identified root causes, and coordinated corrective actions with cross-functional stakeholders.

Challenge Enterprises of North Florida Jacksonville, FL
Project Manager April 2021 - August 2021

- Managed a $2M Defense Commissary Agency contract to maintain profitability while coordinating more than 50 personnel, balancing operational priorities, compliance, quality assurance, risk mitigation, workforce performance, and contract requirements.
- Trained and onboarded employees on job requirements, policies, procedures, safety, quality, and compliance expectations.
- Evaluated employee performance and developed skill-improvement initiatives to strengthen workforce capability, productivity, and compliance; communicated technical and operational requirements to diverse personnel.
- Delivered presentations and maintained training, personnel, contract, and operational documentation supporting workforce readiness and contract compliance using Microsoft Office and Teams.

MILITARY EXPERIENCE

United States Navy Honolulu, HI
Team Leader | Project Manager | AEGIS Computer Network Technician December 2016 - April 2021

- Led a 25-person technical team, including 12 AEGIS Computer Network Technicians, supporting mission-critical computer, network, server, communications, and AEGIS infrastructure in classified DoD environments.
- Provided technical instruction and mentorship to network technicians on Cisco routers, switches, servers, and network operations, strengthening troubleshooting and system-maintenance capabilities.
- Directed responses to more than 50 network and security incidents annually, coordinating investigation, fault isolation, escalation, corrective action, recovery, and restoration of mission-critical systems.
- Configured and troubleshot Cisco routers and switches using Cisco IOS, TCP/IP, Layer 2/3 routing and switching, VLANs, VTP, DNS, DHCP, firewalls, VPNs, and network interfaces.
- Administered and maintained Unix and Linux systems, servers, client/server infrastructure, network-attached storage, and NIPR/SIPR environments, applying network segmentation and diagnostic techniques to maintain operational readiness.
- Maintained 100% operational readiness across assigned systems during deployments, inspections, major casualties, equipment replacements, and upgrades.

United States Navy Dahlgren, VA
Instructional Coordinator | Technical Instructor December 2013 - December 2016

- Instructed more than 100 military, civilian, and contractor personnel in network operations, server maintenance, and data center operations, translating complex technical concepts into practical instruction for adult learners.
- Designed and delivered hands-on laboratories, simulations, lectures, team exercises, discussions, computer-based training, and scenario-based instruction, increasing technical proficiency and operational readiness scores by 30%.
- Authored and modernized cybersecurity and network-operations curriculum to align with evolving technical, security, and operational requirements, improving curriculum relevance by 25%.
- Assessed student performance and provided technical coaching, feedback, and mentoring through classroom, laboratory, LMS, and computer-based training environments.
- Delivered technical lectures covering network administration, hardware/software diagnostics, Unix/Linux, PowerShell, remote management, server maintenance, network troubleshooting, and data center operations.
- Created System Operating Procedures, technical bulletins, user guides, troubleshooting procedures, and instructional materials supporting workforce development, technical adoption, and operational continuity.
- Curated and controlled audit-ready training documentation supporting over 5 annual inspections and Certification & Assessment audits, achieving zero compliance findings while improving training and reporting effectiveness by 25%.
- Coordinated over 15 training and systems initiatives, managing schedules, resources, documentation, and cross-functional collaboration to support workforce readiness.
